

## Is the Bermuda Triangle a Real Mystery?

The Bermuda Triangle is a triangle with corners at Bermuda (B), Florida (F), and Puerto Rico (P). People say that many ships and planes have gone into the Triangle and mysteriously disappeared, never to be seen again. You have been hired to investigate if these ships were actually in the Bermuda Triangle when they disappeared. Here are last known locations of 12 famous ships and planes before they disappeared. Put a dot on the map at the location of each disappearance. Then write a one-paragraph summary of your results. Your paragraph should have a topic sentence, some statements of evidence, and a conclusion.
