

Population Pyramids Review

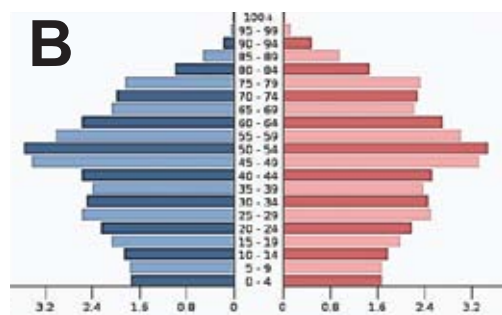

1. Write the letter of the population pyramid that you think matches each country.

- ___ 1. **Germany** has a highly developed industrial economy. Most people have high income and live in cities. Many work in offices, stores, or factories that use computers and robots to make cars, medicines, and other hi-tech products.

Are people like this likely to have a lot of children?

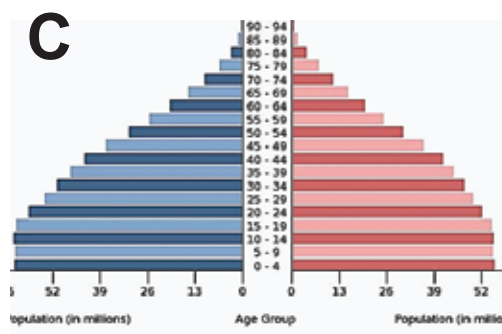

- ___ 2. **India** is a country that is changing from a farm-based economy to a high-tech industrial economy. Millions of people live in cities and make movies, electronic music, and computer software. At the same time, millions of people still live on farms and in small towns.

- ___ 3. **Nigeria** has a farm-based economy. Most people live in rural areas and are subsistence farmers - they raise crops or animals for their own families, not to sell for money. Children often leave school before age 12 in order to help with farm work.

Are people like this likely to have a lot of children?

2. Write a four-sentence paragraph to explain the clues that you used to match countries with their pyramids. Remember to make a topic sentence and then describe some specific examples as evidence to support your topic sentence.
