

A Thermometer Graph That Shows the Temperature in Each Month At *Detroit*

To finish this thermometer graph (thermograph) for New York City:

- 1) Find the right number of degrees for August (73).
- 2) Draw a line at that degree mark on the thermometer for August.
- 3) Lightly shade in the thermometer from the bottom up to that line.
- 4) Do the same for September, October, November, and December.
